Quick Reference Guide

Getting Set Up

Visit iTunes or Google Play and search for “My Mobile Money Access.” Download the app to your phone. Then follow these simple steps:

- Open the app and have your debit card handy
- Click the “Sign Up Free” button
- You will be prompted to enter your card number
- On the next screen enter your name, your CVV (the three digit security code on the back of your card) and your card expiration date to verify your identity
- After you accept the app Terms and Conditions and the Privacy Policy, you will be asked for your email address, user name and password. You may choose to use your email address as your user name. You will also need to enter your full name.

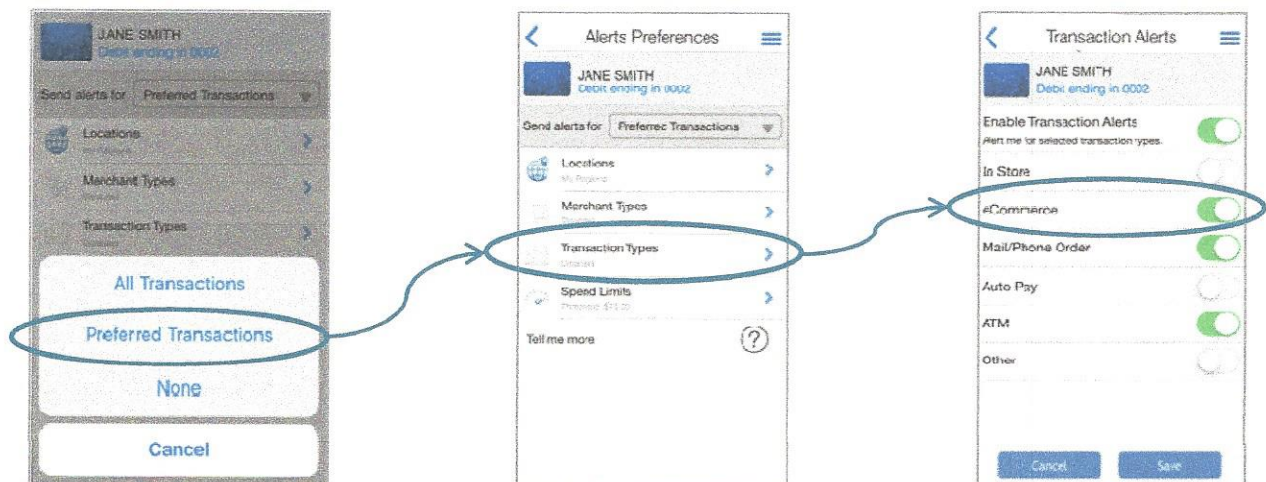

And that's it - you're ready to use My Mobile Money Access!

Setting Alerts

If you want to receive alerts for certain transactions on your mobile device, choose the card you wish to set alerts for and then select **Alert Preferences**. If you want to alert on all transactions, click the “Send alerts for” drop down and select All Transactions.

To set specific alerts, such as alerting for all online purchases, follow these quick steps. Change Alert Preferences to **Preferred Transactions**. Then choose the type(s) of alerts you wish to set. In this case, select Transaction Types as the alert criteria, and slide the button to Enable Transaction Alerts and then choose eCommerce to alert for all online purchases. Don't forget to Save when you are finished setting alerts.

Forgotten Passwords

If you forget your password, tap the Login button. Then choose Forgot Password. Enter your username and click OK. You will be emailed a password reset token to the email associated with your username.

Once you receive the email, revisit this Forgot Password screen and check the box that says "I have the security token" and enter in your token in the field that appears. You will then be able to reset your password. Remember: your password reset token is only valid for a few minutes, so use it right away!
